RE : Super Gyro Tower 53-1x50
DATE : 29.10.2025

PROJECT : 5280

| |
|--|
| DOC. : 5280-IAR-CUST-004 Calculation Confirmation Letter; |
|--|

Dear Alfredo,

This is to formally confirm that the structural calculations for the tower associated with Project 5280 have been performed in full compliance with the applicable international and national standards, including:

- EN 13814
- Eurocodes
- Brazilian standards ABNT NBR 623

The analysis includes all relevant load cases, with particular consideration of environmental actions such as wind, as prescribed by the above standards. Based on these calculations, it is confirmed that the tower structure has been adequately designed to safely withstand all anticipated loads.

If you have any questions, please don't hesitate to contact us.

Best regards,

Intamin Amusement Rides Int. Corp. Est.
Peter Czichon
